Education

Indian Institute of Information Technology, Ranchi

Bachelor of Technology in Electronics and Communication Engineering, Grade: 8.44

Ranchi, Jharkhand

Aug 2023 – May 2027

Experience

Frontend Web Intern, ReachFast.ai – Remote

May 2025 – Aug 2025 | Certificate

- Built an Email Automation UI using React.js, Next.js, and Tailwind CSS across **4+ product features** and workflows
- Integrated **Google Apps Script** with Google Sheets to automate form data collection across **2+ workflows** efficiently
- Worked with TypeScript and Firestore alongside backend engineers, exploring **AWS SES** for reliable email delivery
- Refactored components and redesigned onboarding, improving maintainability and UX across the application

Projects

Splitr – AI Expense Splitting Platform

Website | GitHub

Next.js, TailwindCSS, ShadCN, Convex, Clerk, Inngest, Google Gemini AI, Docker

- Built a real-time expense-splitting platform with dynamic splits, settlements, and detailed summaries, tested across **10+ user groups** processing **100+ expenses**
- Engineered real-time balance synchronization with Convex, achieving **<500ms sync latency**, and integrated Clerk authentication and Gemini AI for automated expense categorization
- Designed a responsive, accessible UI using Next.js, TailwindCSS, and ShadCN, containerized with Docker to reduce environment setup time from **8 to 3 minutes** for faster local development and deployment

BingeBox – Movie Streaming Site

Website | GitHub

React, Redux, TailwindCSS, Axios, Docker, Vercel

- Built a movie discovery platform using the **TMDB API**, surfacing 1.4M+ titles through genre filtering, advanced search, categorized browsing, movie details, and recommendations
- Reduced redundant API calls by **80%** through debounced search and optimized Axios request handling, while Redux managed shared state across **10+ components**
- Containerized the application with **Docker** and deployed on Vercel, completing 15+ production deployments with sub-15-second build times

Chatty – Real-Time Chat App

Website | GitHub

React, Node.js, Express, MongoDB, Socket.IO, Zustand, TailwindCSS

- Developed a full-stack real-time chat application powered by **Socket.IO** and MongoDB, supporting **10+ concurrent users** with persistent message history and live presence tracking
- Managed global state with Zustand for consistent UI updates across components, and secured the app with **JWT**-based authentication, achieving **<200ms average message delivery latency**

Technical Skills

Languages: C++, C, JavaScript, TypeScript, SQL

Frontend: HTML/CSS, React, Next.js, Redux Toolkit, Zustand, Tailwind CSS, ShadCN, GSAP

Backend: Node.js, Express.js, REST APIs, JWT, bcrypt, Mongoose

Databases: PostgreSQL, MongoDB, Redis, Firebase, Convex

Tools and Platforms: Git, GitHub, Docker, Vercel, Render, AWS (S3, EC2), Google Cloud Platform, Inngest, Postman

Awards & Honors

- Ranked in the **top 5%** of JEE aspirants nationwide and scored **90%** in Class 12th
- Solved **300+ DSA problems** across LeetCode, Codechef, and GFG, strengthening algorithmic problem-solving skills
- Reached the internal selection round of **Smart India Hackathon (SIH) 2023** for an innovative project idea
